ABOUT ME

My passion for technology and innovation drives me to explore new areas, identify problems and find effective solutions. I have a unique set of skills, including deep knowledge of programming languages, architectural patterns and optimization techniques, which allows me to create innovative and high-performance applications. My colleagues value me on my ability to solve complex problems, my creative approach to programming, and my ability to work effectively in a collaborative team. I am ready to contribute to any project that values technical progress and strives to achieve outstanding results.

EXPERIENCE

BACKEND DEV / ARCHMANAGER, PRE-RECOVER, LTD
APRIL 2023 - PRESENT

Implemented the principles of DDD and clean architecture to implement successful scaling and development of the company. Was involved in the process of hiring employees, organizational things, etc.

EDUCATION

LIPETSK METALLURGICAL COLLEGE, LIPETSK
SEPTEMBER 2022

Specialist in information systems and programming

SKILLS

- Python, Go, Rust
- React, Redux, Tailwind
- System design
- Organization
- Docker, k8s
- gRPC, GraphQL, REST

ACTIVITIES

Architecture is more than code! In my work, I devote more time to theory and design, because it is not difficult to implement a business task, but difficult to maintain it.
